Families, Resident & Staff

VARIANT NUMBERS are INCREASING rapidly. THE RISK IS VERY HIGH. WE RECOMMEND STRONGLY

We recommend visiting your loved one at their home.....it is overall much safer. Outdoor visits are much more safe than in a household.

RESIDENTS RETURNING FROM HOME VISITS WILL BE ASKED TO REMAIN IN THEIR ROOM FOR 24 HOURS FOR MONITORING.

PUBLIC HEALTH STATES: **ARE YOU ABLE TO DO THIS?**

Gatherings

- households can choose one of the following:
 - designating two visitors to their home; or
 - designating a second household so that the two households can visit each other, as long as everyone in the house has authorized those designated individuals to visit.
- Outdoor visits of up to 10 people only plus members of a household on an outdoor private property.
- Current orders prohibit gatherings of more than 25 people at an outdoor public place or more than five people at an indoor public place or the common areas of a multi-unit residence..

*****IMPORTANT***** RESIDENT RETURN FROM HOSPITAL***IMPORTANT**

No resident can return fom hospital with out authorization from a Manager.
