## Public Health Orders- Covid 19 Rising Numbers

**The daily rising Covid 19 case numbers are very concerning, and Omicron has not begun to have effect yet.**

We ask that you follow our screening and vaccination card protocols strictly. This screening is most important to our seniors.

Shared Health has advised that having the vaccines and booster is significant in fighting the variants. If you have a family member that has only had the two vaccines, please be mindful of when they would be eligible for the booster. Its also important for families of Riverwood Square to get the booster. We can get thru this next wave just as we have by being cautious.

Its important to recognize that with the rising numbers the hospitals are in crisis. People are being sent to alternative rural hospitals. Seniors are the most vulnerable.

**IMPORTANT:** If your loved one should go to hospital and has been released - family must call ahead to advise of the return. Family must provide the 'restricted code' that the hospital is in, Green, Yellow, Orange, or Red. Please call reception and the Manager on duty will be advised.

*We strongly encourage you to do your visiting with your loved ones at Riverwood Square- in their home. There are many areas in the building that folks can visit safely. Visit in their rooms, bistro and fireside lounge, library. We are only restricting the dining room for visitors please.*

*For those that are going out we will be implementing a 24 hour 'stay in your room' policy where we will monitor temperature and well- being. Those residents will have room service and be checked on thru out the 24-hour period.*

Thank you for all the support. Call if you have questions or concerns call Linda 204-594-1267.

Happy Holidays to All

Linda Sherrin

For your understanding

Amendment to above – 24-hour monitoring will be implemented for those residents that attend social gatherings of 10 people in the household.
